

# **INSULNET™ FROST / THERMAL BLANKET – new release**

"Insulnet™" is an almost transparent knitted fabric used in Australia to reduce or prevent frost damage.

It is permeable to allow moisture and light through but at a reduced rate.

It provides minimal shading.

## **SPECIFICATIONS:**

Rolls:	4m x 50m ( 200 m <sup>2</sup> ) 2m x 100m (200 m <sup>2</sup> )
Colour:	Natural
Weight:	17 kg per roll
Packing:	Each roll is strapped then wrapped in a plastic bag.
Protection:	UV stabilised

*Samples are available.*

## **BENEFITS:**

In a climate of >100 days per year of -5°C nights, this frost blanket has been used for 3 years on Sir Walter Buffalo Turf.

Under the blanket –

- leaves remained green while covered allowing spring sales to begin 2 months earlier.
- soil temperature at 100mm was 2° C higher.

## **PEGS:**

We have some ideas. Give us a call.

One is an inexpensive, home-made, painted steel peg which is easily constructed.

They hold the blanket down successfully at 10m spacing.

Long shaft means it is easy to use with no bending involved

Painted for quick identification in the field.

## **TRIAL:**

Why not try a roll or two this winter!
