

Polymet Perforated Film

Perforated Film – Pre-stretched

Perforated Film - Conventional

The greatest benefit of Perforated Film (PF) is that it is accepted by major retail distribution centres, as a breathable wrapping material.

Uses:

- Breweries: Condensation issues can arise when warm product meets cool outside temperatures.
- Soft Drinks: Condensation issues can arise when cold product meets warm/hot outside temperatures.
- Pharmacies: Dialysis and blood derivatives.
- Dairy: Cheese, eggs, fresh meat.
- Fruit and Veg: Especially if travelling direct to supermarket DC's.

Other Benefits:

- Offers up to 60% air flow.
- Maximum stretch and strength.
- Contains heavy loads & forklift friendly.
- Excellent carton printing visibility after wrapping.
- Available in Pre-stretched and Conventional grades (to 250%). Hand and machine rolls available.
- Soft on carton corners preventing crushing.
- Prevents condensation build up.
- Runs smoothly on most wrapping machines.
- Lightweight to handle even in largest rolls.
- Significant financial and efficiency savings compared to angles / straps.
- Maintains web width under tension.
- Less waste and recyclable.
- Suitable for a wide variety of applications such as fresh food, drinks, frozen food, hot fill.
